

Interpretation and Consideration of the Great East Japan Earthquake 2011

- From the perspective of assistance
 to developing countries
 in the field of disaster prevention -

Japan International Cooperation Agency(JICA)

Shinya EJIMA

Director General, Global Environment Department

国際協力機構

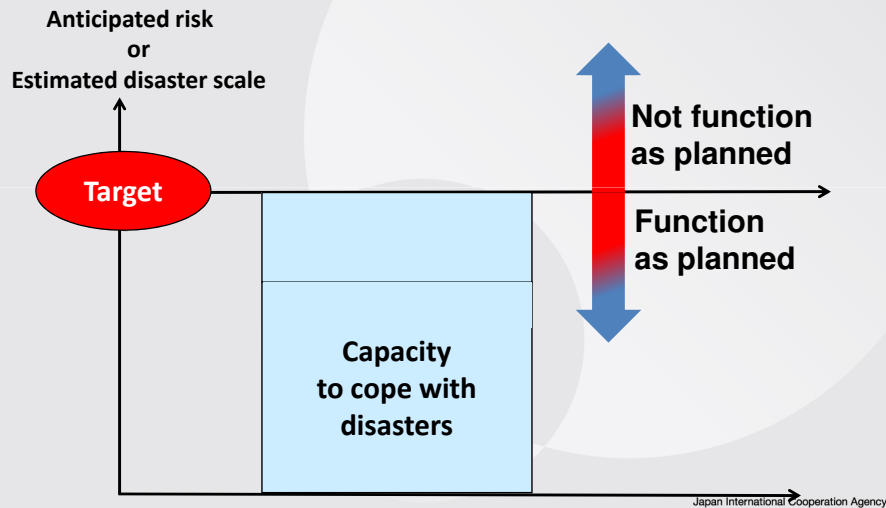

“The Study on the Effective Countermeasures against Earthquake and Tsunami Disasters; Lesson Learned from the Disaster and Recovery”

- To obtain lessons from the disaster and recovery process, applicable to JICA's future assistance for disaster risk management (DRM).
- Three (3) kinds of gaps were emerged between anticipated risk and actual risk, or capacity of society/community.
- JICA's “Trinity Approach” was proposed: (1) KAIZEN, (2) Risk communication, and (3) Redundancy, on the foundation of an integrated risk reduction strategy.

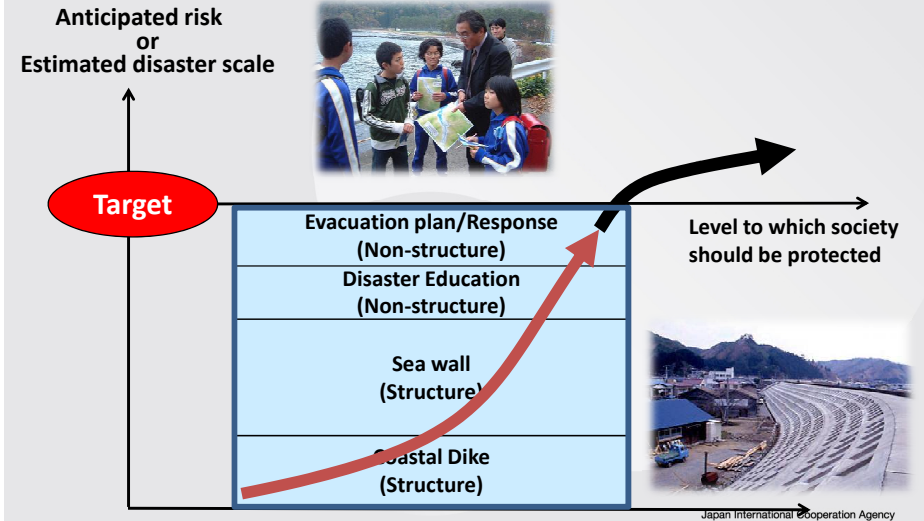

Conventional Disaster Risk Management (DRM)

- Scenario disaster and anticipated risk -

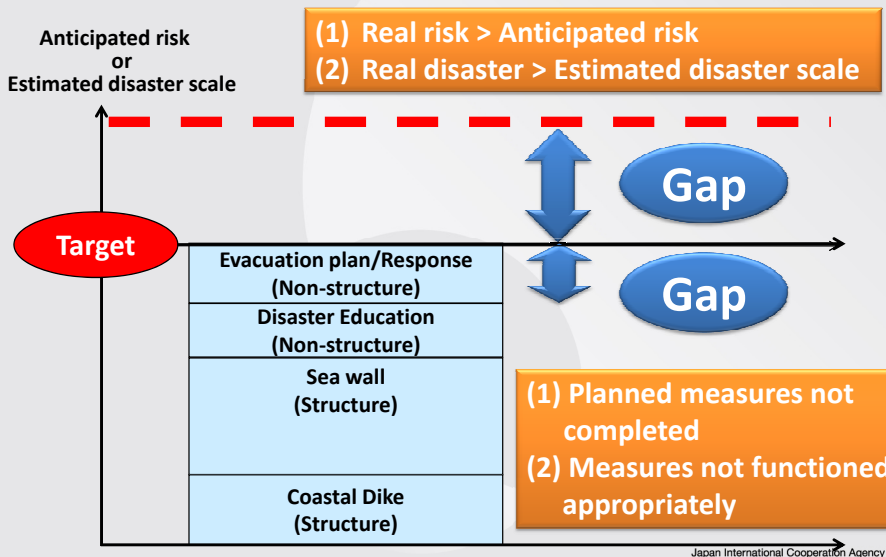

Conventional Disaster Risk Management (DRM)

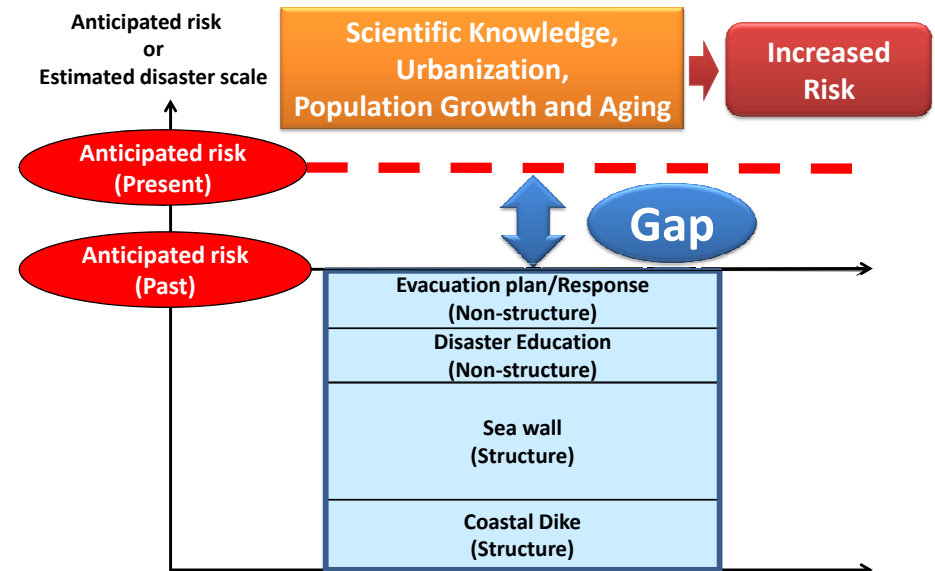

- Combination of structure and non-structure measures -

Hidden Gaps of Disaster Risk Management (DRM)

(1) Progressive "GAP" in anticipated risks over time

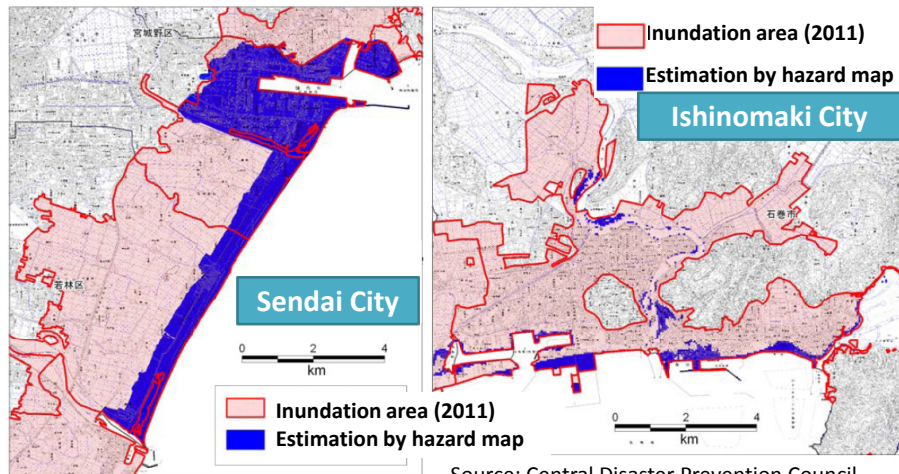

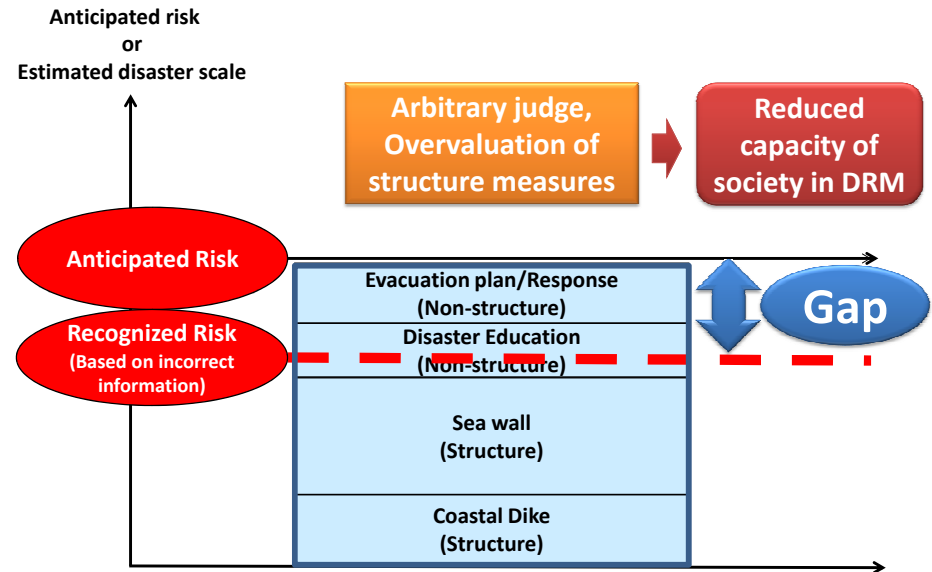

Latest scientific knowledge need to be considered

Changes of society like aging need to be paid attention

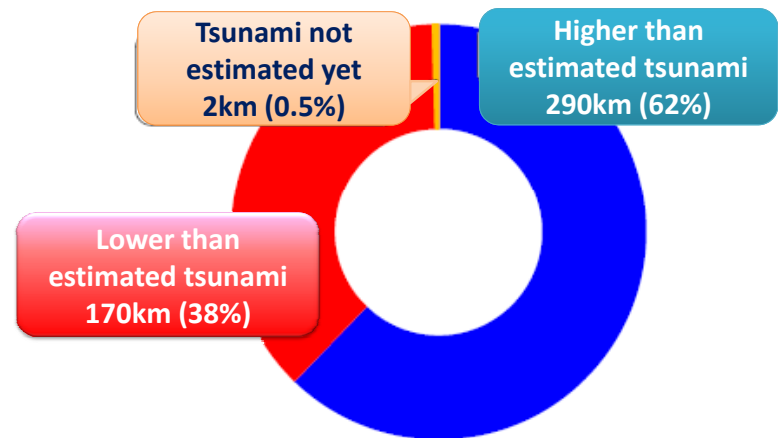

(2) Emerging "GAP" in risk between reality and recognition

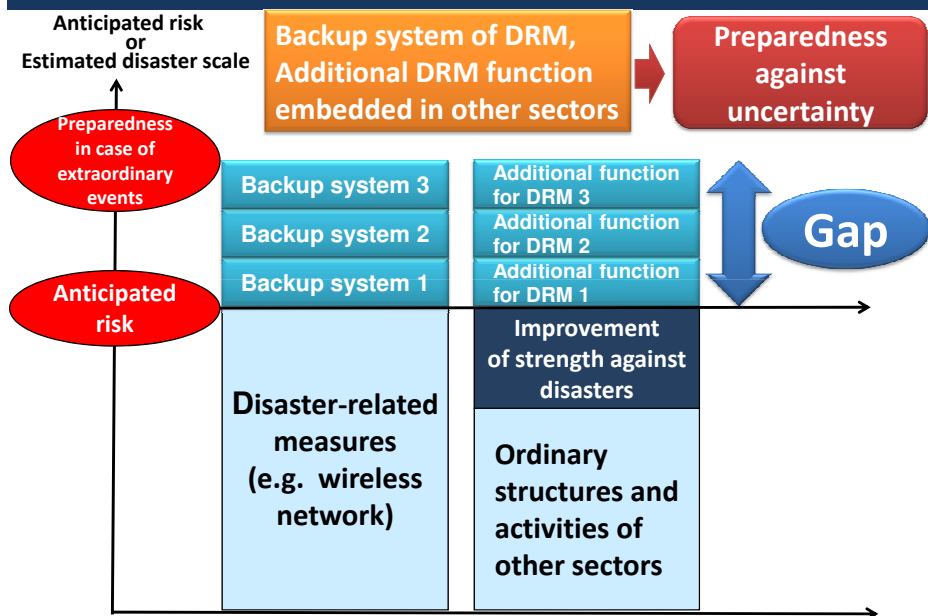

Disaster information needs to be carefully distributed

Mismatch of standards for construction of coastal levee

Coast of Tohoku Region 460km

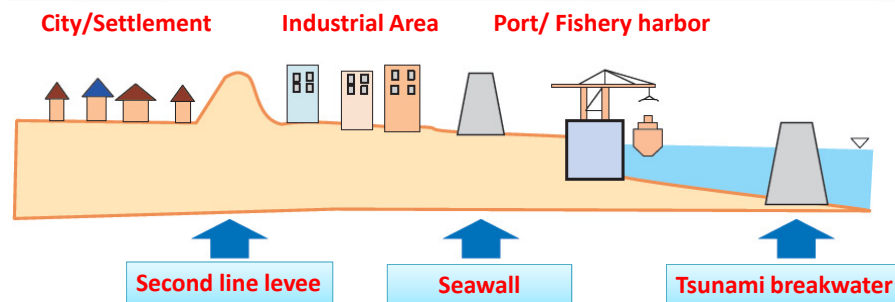

(3) "GAP" between anticipated risk and uncertain risk

Elevated highway blocked tsunami and reduced damage

Land use considering multilayered measures

Filling the "GAPs"

①

Progressive "GAP" in anticipated risks over time

KAIZEN
(Improvement)

Continuous improvement and review of countermeasures considering:

- (1) scientific aspects (estimated scenario disasters, advancement in technology, etc.), and
- (2) social aspects (population growth, urbanization, aging society, etc.).

Filling the "GAPs"

②

Emerging "GAP" in risk between reality and recognition

Risk Communication

Process of information exchange on risks among related stakeholders considering:

- (1) Limitation of structure and non-structure measures should be properly recognized, and
- (2) Communication among various stakeholders should be promoted.

Filling the "GAPs"

③

"GAP" between anticipated risk and uncertain risk

**Redun-
dancy**
(multidense)

Inclusion of extra components
to original functions in preparation for uncertainty considering:
(1) inclusion of redundancy into DRM, and
(2) inclusion of DRM into other sectors (multisectoral approach).

Filling the "GAPs"

Strategy

Comprehensive and inclusive basis for disaster risk reduction

considering:
(1) Holistic optimization of measures taken by individual stakeholders, and
(2) Broad sharing within the whole society.

JICA Trinity Approach

Application of JICA Trinity Approach

Sustainable Development based on Safe and Resilient Society

JICA Trinity Approach for improving quality of DRM

Mainstreaming of Disaster Risk Management

Efficient Resource Mobilization

Advance in Quality of DRM

Inclusive Coverage of Other Sectors

Application to JICA project

KAIZEN

- Revise emergency road network
- Revise master plan for community-based disaster management

Risk Communication

- Disaster management museum
- Large-scale practical evacuation drill

Redundancy

- Redundancy plan of emergency road network
- Backup communication line

STRATEGY

Comprehensive Master Plan on Urban Seismic Disaster Prevention and Management for Tehran

Application to JICA project

KAIZEN

- Considering implementing body to revise and review curricula and materials

Risk Communication

- Understanding of difference between desk plans and practices in evacuation response

Redundancy

- Both education and quake resistant building
- Inclusion of DRM into various subjects and club activities

STRATEGY

National Earthquake Strategy and Action Plan

Input to International DRM Strategy

2012	2013	2014	2015
International conference on disaster	4 th Global Platform for Disaster Risk Reduction (GPDRR)		3 rd World Conference on Disaster Reduction

Discussion on new strategy on DRM and new framework after HFA (Hyogo Framework for Action 2005-2015)

Post-HFA

Thank you very much for your kind attention.
